

KPD Pty Limited laboratory furniture for secondary schools

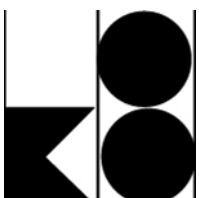

Design, manufacture, install and guarantee

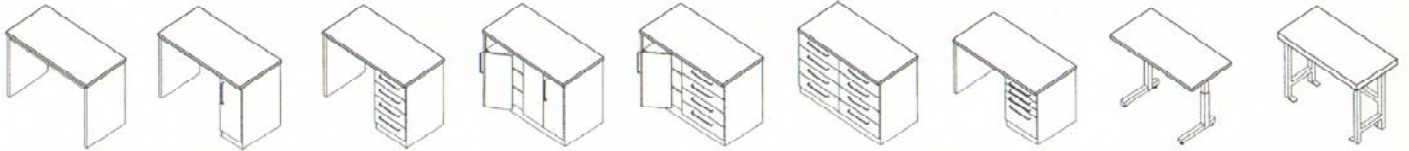

Design Advice

Unlike general commercial joinery, laboratory fitments are required to meet particular safety and chemical resistance performance criteria best resolved by specialist providers.

Our specialist consultants are available to architects and specifiers for assisting in determining the appropriate surface finishes and fixtures required. Provision of detailed drawings for effective integration of laboratory services and advice for resolution of benching systems is also available.

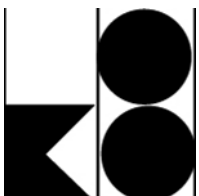

Design, manufacture, install and guarantee

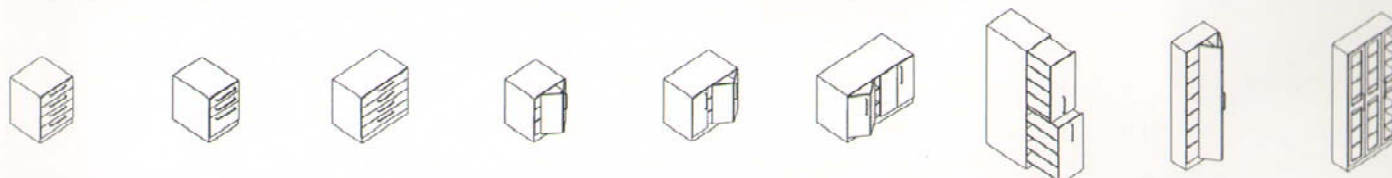

Manufacture

Applying our extensive laboratory furniture systems development experience to secondary school installations, **KPD Pty Limited** have provided specialist consultancy and student bench products to teaching labs throughout Australia.

KPD is a leading provider of furniture systems specifically developed for teaching laboratories compliant with Australian Standards.

Design, manufacture, install and guarantee
